

Dear Rising 4th Graders,

Welcome to 4th Grade! We can't wait to welcome you in August. In the meantime, enjoy your summer and keep your skills fresh with the reading and math assignments explained below. These assignments are due on the first day of school.

### Reading

- Please choose at least **3** books that are within your AR reading level (this can be found on your report card in the comments section).
- After you read the book, please go on to [AR](#) and take the test that goes with your book. The Renaissance ID is SJEDS-13FB. Then your username is the initial of your first name and first 4 letters of your last name (Example - mine would be mtrum). Your password is just your initials (Example - mine would be mt).
- All reading will need to be completed by July 31, 2021.

Also, [AR Book Find](#) is a great site to search for books to see what level they are ([www.arbookfind.com](http://www.arbookfind.com)).

### Typing

- In addition, we type most of our essays and writing pieces, therefore typing skills become important and useful. Take some time over the summer to complete some typing practice. In addition, we type most of our essays and writing pieces, therefore typing skills become important and useful. Take some time over the summer to complete some typing practice.
- Please go to [Typing Club](#). The join code is **D26XPWS**. You can go on and practice as much as you would like. I would encourage you to practice 2-3 times per week. There are lessons for you to complete and then games that help you practice the skills that you have learned. I will send your usernames and passwords to your parents.

### Math

- Practice the basic addition, subtraction, multiplication, and division facts. **Each student will be assessed in August for basic fact fluency.**
- Complete the math Summer Work on [eSpark](#) and [Sum Dog](#) to practice the following skills: telling time, addition and subtraction facts, subtraction with regrouping, double and triple-digit addition, practice counting coins, word problems, two-dimensional and three-dimensional shapes. This review of math concepts was chosen to compliment the math curriculum and to review skills learned in fourth grade. Take your time and do your best!

Happy Summer!

Your Fourth Grade Teachers
